Subject Index: Volume 30, 1997

Accessory pathways
computer-assisted identification of, 355
Acetaldehyde
and arrhythmias in animals, 137
Action potentials
monophasic, configuration affected by activation sequence in dogs, 65
Afterdepolarizations
delayed, from substances of abuse, 137
early, epinephrine-induced, 217
Aged patients
ambulatory ECG monitoring in strokes, 354
Alcohol
and arrhythmias in animals, 137
Aldrich formulas
in prediction of final infarct size, 1
Ambulatory ECG
in aged patients with stroke, 354
and circadian heart rate variability in shift workers, 39
circadian variation of QT interval dispersion in, 206
evaluation of wrist-applied arrhythmia monitor in, 127
ischemia detection in, 187
Amiodarone
in ventricular tachycardia in hemochromatosis, 147
Amphetamine
and arrhythmias in animals, 137
Aneurysms
left ventricular, postinfarction, QRST isointegral maps in, 349
Angiography, coronary
in posterior myocardial infarct, 360
Angioplasty
balloon, continuous ST-segment monitoring in, 175
Angiotensin-converting enzyme inhibitors
in ventricular arrhythmias with heart failure, 355
Animal studies
antiarrhythmic agents affecting reentrant atrial tachycardias, 345
arrhythmias from substances of abuse, 137
epinephrine-induced early afterdepolarizations, 217
experimental porcine model of isolated ischemia, 71
posthypoxic recovery in guinea pig papillary muscle, 346
R wave amplitude changes in rabbits, 211
recovery of electrophysiologic activity after partial reperfusion in dogs, 13
retrograde P waves around atrioventricular ring in dogs, 349
d-sotalol affecting rat cardiomyocytes, 345
spectral analysis of electrograms in ventricular tachycardia, 225
ventricular activation sequence affecting monophasic action potential configuration in dogs, 65
Antiarrhythmic therapy
conduction disorders after, in hypertrophic cardiomyopathy, 341
and epinephrine-induced early afterdepolarizations, 217
pilsicainide compared to disopyramide in paroxysmal atrial fibrillation, 347
and reentrant atrial tachycardias in rabbits, 345
Antimonial drugs
torsade de pointes from, 143
Arabs, black
juvenile ECG pattern in, 87
Arrhythmias
evaluation of wrist-applied monitor in, 127
from substance of abuse, 137
Atrial arrhythmias
paroxysmal fibrillation
comparison of antiarrhythmic agents in, 347
P wave analysis in, 79
reentrant tachycardia affected by antiarrhythmic agents, 345
Atrioventricular reentrant tachycardia
heart rate after radiofrquency ablation in, 239
Autonomic nervous system
activity in myocardial ischemia, 45
circadian activity in shift workers, 39
heart rate control in coronary artery disease, 353
neuropathy in diabetics affecting QT dispersion, 354

Batista operation
body surface mapping after, 350
vectorcardiography before and after, 358
Black Arabs
juvenile ECG pattern in, 87
Body surface mapping
after Batista operation, 350
database in JUMP 2001 project, 351
electrode positioning affecting computer analysis in, 247
in intermittent Wolff-Parkinson-White syndrome, 323
isochrone, with threshold potential, 359
retrograde P waves around atrioventricular ring in dog, 350
in right ventricular dysplasia, 351

Brugada syndrome
effects of disopyramide in, 133

Cardiomyopathy
diabetic
and large bites in 12-lead vectorcardiogram, 92
magnetocardiogram in, 293
ECG features in dilated and hypertrophic types, 301
hypertrophic
and conduction disorders after antiarrhythmic therapy, 341
QRST isointegral maps in, 21
Case report
hypermobile pacemaker, 265
Catheter ablation
heart rate after, 239
Cerebrovascular accidents
in aged patients, ambulatory ECG monitoring in, 355
Children
healthy, signal-averaged ECG in, 277
right ventricular overload in, and precordial leads QRST time integrals, 257
Circadian variations
in heart rate in shift workers, 39
in QT interval dispersion, 205
Clofilium
affecting epinephrine-induced early afterdepolarizations, 217
Cocaine
and prolonged QT interval, 337
Coherence spectrum
analysis in ventricular tachycardia in dogs, 225
spatial, in analysis of multichannel electrograms, 9
Computer analysis
electrode positioning affecting, 247
heart rate affecting vulnerability to fibrillation, 307
identification of accessory pathways, 356
simulation studies
heterogeneous left ventricular hypertrophy, 347
torsade de pointes with QT prolongation, 347
ST-segment deviation measurement, 151
ST-segment/heart rate slope in ischemia, 161
vectorcardiographic bites in diabetic patients, 91
Conduction disorders
after antiarrhythmic therapy, 341
Coronary artery disease
autonomic heart rate control in, 353
ischemia in. *See* Ischemia, myocardial
and negative U wave in dobutamine stress echocardiography, 57
newer exercise testing indices in, 355
ST-segment/heart rate slope in, 161

Decartograms
in detection of right ventricular enlargement, 355
Diabetes mellitus
and large bites in 12-lead vectorcardiogram, 92
and magnetocardiogram in cardiomyopathy, 293
Diltiazem
and recovery of electrophysiologic activity after partial reperfusion in dogs, 113
Dipole
heart moment measurements, 348
jumping, in inverse localization of preexcitation sites, 348
Disopyramide
compared to pilsicainide in paroxysmal atrial fibrillation, 347
conduction disorders after, 341
effects in Brugada syndrome, 133
Dobutamine stress test
compared to standard exercise test after infarction, 189
negative U wave in, 57
Drug abuse
arrhythmias from, 137
prolonged QT interval from cocaine, 337
Dysplasia
right ventricular, ST-T waves in, 350

Echocardiography
in dilated and hypertrophic cardiomyopathies, 301
dobutamine-induced negative U wave in, 57
Electrical organization of heart
coherence analysis of, 9
Electrodes
configuration needed for noninvasive rejection monitoring, 356
positioning affecting computer analysis of ECG, 247
Electrophysiology
epinephrine-induced actions after antiarrhythmic drugs, 217
mapping with heart dipole moments, 348
recovery of activity after partial reperfusion in dogs, 113
reductive ventriculectomy affecting, 350
Epicardial electrograms
analysis with spatial coherence, 9
spectral analysis in ventricular tachycardia, 225
Epinephrine
electrophysiologic actions after antiarrhythmic drugs, 217
Ethanol
and arrhythmias in animals, 137
Exercise ECG
compared to ambulatory ECG monitoring in ischemia, 197
compared to dobutamine stress test after infarction, 189
compared to SPECT in ischemia, 358
decreased Q waves in ischemia opposite infarct area, 359
giant negative U waves in, 105
normalization rates of newer indices in, 356
paired test after spa therapy, 353
Q wave disappearance in, 97
and ventricular arrhythmias in hypertension, 346
Exit block
with intermittent parasystole, 331
Fatty acids
impaired utilization in myocardium, 21

Fibrillation
atrial paroxysmal
comparison of antiarrhythmic agents in, 347
P wave analysis in, 79
ventricular
in Brugada syndrome, disopyramide affecting, 133
and spatial coherence in analysis of multichannel electrograms, 9
vulnerability to, heart rate affecting, 307

Harmine
and arrhythmias in animals, 137
Heart failure
ventricular arrhythmias in, angiotensin-converting enzyme inhibitors affecting, 355
Heart rate
after radiofrequency ablation, 239
analysis with spectral-temporal methods, 354
autonomic control in coronary artery disease, 353
circadian variability in shift workers, 39
and circadian variation of QT interval dispersion, 205
during sleep and wakefulness, 352
slope response and ST-segment deviation in ischemia, 161
variability in myocardial ischemia, 45
and vulnerability to fibrillation, 307
Hemochromatosis
ventricular tachycardia in, 147
Hemorrhage
subarachnoid, torsade de pointes with, 31
Holter monitoring. *See* Ambulatory ECG
Hypertension
and autonomic neuropathy in diabetics, QT dispersion in, 354
ventricular late potentials in, 346
Hypertrophy
left ventricular, heterogeneous, computer simulation of, 347
right ventricular, detection with decartograms, 358

Infarction. *See* Myocardial infarction
Ischemia, myocardial
acute isolated right ventricular injury in, 71
body position affecting ECG in, 285
and continuous ST-segment monitoring during angioplasty, 175
detection with ambulatory ECG monitoring, 197
exercise-induced, Q wave disappearance in, 97
giant negative U waves in, 105
heart rate variability in, 45
measurements of ST-segment deviation in, 151
posthypoxic recovery in guinea pig papillary muscle, 346
and R wave amplitude after reperfusion, 211
and recovery of electrophysiologic activity in dogs, 113
ST-segment/heart rate slope in, 161
vectorcardiography compared to SPECT in, 358

JUMP 2001 project
body surface potential map database in, 351
Jumping dipole
in inverse localization of preexcitation sites, 348
Juvenile ECG pattern
in adult black Arabs, 87

Left ventricle
heterogeneous hypertrophy of, computer simulation of, 347
postinfarction aneurysms of, QRST isointegral maps in, 349
Letter to the Editor
isolated infarction of right ventricle, 157
Lidocaine
and recovery of electrophysiologic activity after partial reperfusion in dogs, 113
Lux-type lead system
evaluation of, 351

Magnetocardiogram
in diabetic cardiomyopathy, 293
Metoprolol
conduction disorders after, 341
Myocardial infarction
body surface isochrone maps with threshold potential in, 359
and decrease in Q waves in ischemia opposite infarct area, 359
dobutamine ECG stress test in, 189
giant negative U waves in, 105
isolated in right ventricle, 157
posterior, ECG and coronary angiography in, 360
prediction of final infarct size in, 1
QRST isointegral maps in postinfarct left ventricular aneurysms, 349
size estimation with QRS scores, 315

Orthogonal ECG
and continuous ST-segment monitoring during angioplasty, 175

P waves
retrograde, around atrioventricular ring in dog, 349
spectrotemporal analysis in paroxysmal atrial fibrillation, 79
Pacemaker
hypermobile, case report of, 265
Parasystole
intermittent, with exit block, 331
Pneumothorax
left-sided, unusual ECG variations in, 109
Position
of body, affecting ECG, 285
of electrodes, affecting computer analysis of ECG, 247
Precordial leads
QRST time integral values in right ventricular overload, 257
Preexcitation sites
inverse localization of, 348

Propranolol
and arrhythmias in animals, 137

Q waves
disappearance in exercise-induced ischemia, 97
measurements in prediction of final infarct size, 1
in transient ischemia opposite infarct area, 359
QRS complex
in left-sided pneumothorax, 109
scoring system for infarct size estimation, 315
QRST isointegral maps
in hypertrophic cardiomyopathy, 21
in intermittent Wolff-Parkinson-White syndrome, 323
in postinfarct left ventricular aneurysms, 349
in right ventricular overload in children, 257
QT interval
circadian variation of dispersion, 205
dispersion in diabetics with autonomic neuropathy and hypertension, 354
prolongation
after cocaine use, 337
from antimonial drugs, 143
in torsade de pointes
simulation study of, 347
with subarachnoid hemorrhage, 31

R wave
amplitude changes in rabbits, 211
in left-sided pneumothorax, 109
Radiofrequency catheter ablation
heart rate after, 239
Reperfusion
and infarct size estimation with QRS scores, 315
partial, and recovery of electrophysiologic activity in dogs, 113
ST-segment elevation in, 211
Repolarization
abnormalities in hypertrophic cardiomyopathy, 21
in intermittent Wolff-Parkinson-White syndrome, 323
and T wave slopes in men and women, 267
Respiratory sinus arrhythmia
suppression in myocardial ischemia, 45
Right ventricle
dysplasia of, ST-T waves in, 351
enlargement detection with decartograms, 358
isolated infarction in, 157
overload in children, and precordial leads QRST time integrals, 257
Risk stratification
dobutamine ECG stress test in, 189

Scintigraphy
correlation with QRST isointegral maps, 21
and Q wave disappearance in exercise-induced ischemia, 97
Shift workers
circadian heart rate variability in, 39
Signal-averaged ECG
in healthy children, 277
P wave analysis in paroxysmal atrial fibrillation, 79
Sleep and wakefulness
heart rate in, 352
d-Sotalol
affecting rat cardiomyocytes, 345
d,l-Sotalol
affecting epinephrine-induced early afterdepolarizations, 217
Spa therapy
paired exercise test after, 353
Spatial coherence
in analysis of multichannel electrograms, 9
SPECT
compared to vectorcardiogram or exercise ECG in ischemia, 358
Spectral analysis
of heart rate ECG, 353
P wave in paroxysmal atrial fibrillation, 79
in ventricular tachycardia, 225
Strokes
in aged patients, ambulatory ECG in, 354
ST-segment
continuous monitoring during angioplasty, 175
deviation in prediction of final infarct size, 1
elevation after reperfusion, 211
and heart rate slope in ischemia, 161
measurements of deviation, 151
shifts caused by body position changes, 285
ST-T waves
in right ventricular dysplasia, 350

T wave
inversion
in black Arabs, 87
in left-sided pneumothorax, 109
measurements in prediction of final infarct size, 1
slopes in men and women, 267
Tachycardia
atrial reentrant, antiarrhythmic agents affecting, 345
atrioventricular reentrant, heart rate after radiofrquency ablation in, 239
ventricular
after partial reperfusion in dogs, 113
in hemochromatosis, 147
spectral analysis of electrograms in, 225
Time integral values
of precordial ECG in children, 257
Torsade de pointes
from pentavalent antimonial drugs, 143
simulation study of, 347
with subarachnoid hemorrhage, 31
Transplantation rejection
electrode configuration for noninvasive monitoring of, 356
Triggered activity
from substances of abuse, 137

U waves, negative
in dobutamine stress echocardiography, 57
giant, in acute infarction and ischemia, 105

Vagal activity
in myocardial ischemia, 45
Vectorcardiography
before and after Batista operation, 358
compared to SPECT in myocardial ischemia, 358
and continuous ST-segment monitoring during angioplasty, 175
and large bites in diabetic patients, 91
Ventricular activation sequence
affecting monophasic action potential in dogs, 65
Ventricular arrhythmias
exercise-induced, in hypertension, 346
fibrillation
in Brugada syndrome, disopyramide affecting, 133
and spatial coherence in analysis of multichannel electrograms, 9
in heart failure, angiotensin-converting enzyme inhibitors affecting, 355
intermittent parasystole with exit block, 331
tachycardia
after partial reperfusion in dogs, 113
in hemochromatosis, 147
spectral analysis of electrograms in, 225
Ventriculectomy, reductive
body surface mapping after, 350
vectorcardiography before and after, 358

Windowed median successive difference
and heart rate variability in ischemia, 45
Wolff-Parkinson-White syndrome
computer-assisted identification of accessory pathways in, 355
intermittent, cardiac memory in, 323
